

KronoLOC
DOUBLE Laminate Collection

towards enhanced durability & comfort with
DOUBLE protection.

www.kronoloc.com

Surpassing universally accepted standards.

While we take pride in our state-of-the-art European technology and techniques in the manufacturing of **KronoLOC** flooring, we are cognizant of the pressing need to preserve our precious planet. As a responsible global business partner, we are therefore deeply committed to producing products not only of exceptional quality but will have a positive impact on the environment and the citizens of the world.

KronoLOC flooring is synonymous to high quality laminate flooring with **DOUBLE** protection, at the surface and bottom of the panel, for enhanced durability and perfect-board dimensional stability. All **KronoLOC** floorings are eco-friendly and specifically engineered to maintain a remarkably safe, healthy and beautiful environment – within the comforts of your home or workplace.

DOUBLE Lamination Protection

The latest **DOUBLE** lamination process (Perfect Equal Centric Technology) forms a "perfect board dimensional stability" from top to bottom. The High-Density Fiberboard (HDF) is not only absolutely stable but is significantly more durable than others in its range as it gets double protection on both sides – on the surface and underneath.

① & ⑤

DOUBLE Anti-abrasive Overlay

The **DOUBLE** Anti-abrasive Overlay consists of millions of aluminum oxide particles, which act as deterrent against scuffs and normal wear.

② & ④

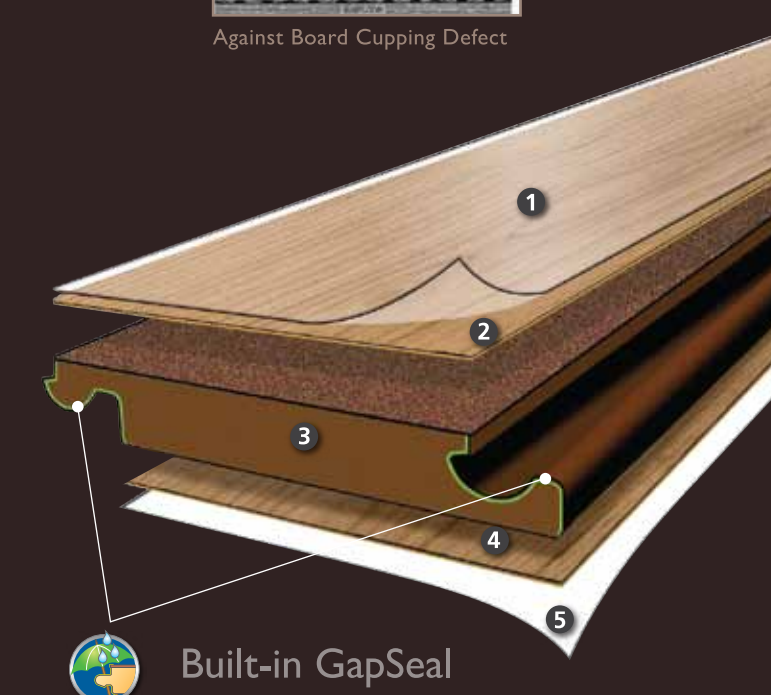

DOUBLE Decorative Paper

The **DOUBLE** Decorative Paper is impregnated with melamine resin and is available in various colours and designs.

③

Superior Quality Aqua-resist HDF

The high-density fiberboard (HDF) acts as the carrier or substrate for the floorboard. It is made from wood fibres, compressed under high temperature and high pressure to produce a material that is suitable to be used as the core of the board.

Warranty & Certificate

Use class ▶	Abrasion Class	Use Class	Degree of Use
	AC3	23	Suitable for all residential areas
	AC3	31	Suitable for light & moderate commercial areas

Structural Warranty
A claim is valid if the floorboard surface material, i.e. the protective layer and the decorative layer, are separated from the core material-HDF due to improper pressing or milling.

No-Wear-Thru-Warranty
A claim is valid if at least one square centimeter of the floorboard surface has been completely rubbed off.

No-Staining Warranty
A claim is valid if the stains are visible on the floorboard surface due to the following substances: acetone, hand-cream, fruit and vegetable drinks, tea, coffee, cold drinks, nail lacquer or similar products.

Terms & Conditions

This warranty is valid for floorboards that have been laid in "DRY" areas where they are exposed to normal wear on their recommended "Use Class" but not in the event of unusual chemical stress, wrong cleaning methods, cuts, scratches, impact or accidents.

REMEDY FOR WARRANTY IS REPLACEMENT OF FLOORBOARD ONLY. TRANSPORTATION CHARGES, ACCESSORIES & OTHERS RELATED MATERIALS ARE EXCLUDED IN THE WARRANTY. (If the required colour is not available, a selection will be made from the product range available at the time.)
